ANDREW ORMAN

0427 435 201

Andrew, Jules, Sam and Georgie are pleased to extend an invitation to you to attend our 10th annual Benelkay Poll Santa Gertrudis Bull Sale on Thursday the 19th of August 2021 at 1.00pm on property "Glenmore" Mullaley. This is the final day of Ag-Quip this year, so accommodation will be limited, booking outside of Gunnedah is recommended. This is somewhat of a milestone year for our family and the Stud. It is Sixty years since my father introduced Santa Gertrudis cattle over his British breed cows. Fifty years since he registered the Stud name Benelkay with the SGBAA number 810 and it is also our Tenth on Property Bull Sale. Over this time, I have tried to add up how many bulls the family have put out into the industry and as a rough estimate it would be around two thousand. We must be doing something right as our clients keep coming back year after year.

As a result of the seasonal break, crops and pasture growth in Northern NSW are looking solid for this time of year. Cattle are fat and producers are thinking of their next move to increase their beef production. The eastern young cattle indicator is enjoying a recovery like never seen before with cattle prices at record levels. It is enjoyable to see the positivity in beef producer's attitudes once again.

We are pleased to present to you our line-up of Poll and a few Horned Santa Gertrudis bulls, responding to clients who, for a range of reasons need to be able to purchase polled and horned bulls to suit their operations. I feel confident with the overall quality and evenness of the sale team. We are very proud to offer this year's group of sale bulls and feel they are of the highest quality we have offered, mostly due to the high standard of our own sire battery we are using over our 400 stud cows.

We are offering a range of types of bulls to suit different market requirements and realize not all bull buyers are looking for the same type of bull for their operation. We have aimed to keep abreast of the beef industry and have made considerable investments in poll sires in the past forty years to produce seed stock bulls to suit both the commercial and stud sectors. We have started using our own Homozygous Sires to increase this trait within our own female stud herd, with very pleasing results.

All bulls will have BreedPlan figures to assist you in the selection of the sire to suit your breeding objectives. Also, what must be realised is that we buy in all our sire's from non Breedplan herds, as these bulls have many other traits we are chasing in our herd, and we need to have other genetics coming into the system of Breedplan. The downside of this consequence is it does take a few years to get reliable data on the un-Breedplan, non – proven Breedplan bulls. Due to this most of our sires start below breed average for all their data so it does take a while to get the amount of progeny on the grown and tested to get the accuracy of the Breedplan traits comparable to herds using Breedplan bred sires only.

We will also have raw data figures for weight, DWG, scans for EMA and Fats. All bulls are semen, morphology (Laboratory Morphology examinations done by QMSL - Goondiwindi) and vet tested by Mark Baker, Gunnedah Saleyards Veterinary Clinic. Our aim is to provide paddock reared fit and healthy bulls, so cattlemen can be confident in their bull purchases. You can view pictures of the sale draft at [www.benelkaysantas.com.au](http://www.benelkaysantas.com.au) or contact Andrew 0427 435 201 directly for more information or to arrange inspections presale if you feel that it will assist you. Looking forward to catching up with you all on sale day.

Regards Andrew, Jules Sam and Georgie Orman

## Health - Vaccinations

7 in 1, Vibro, AD&E and Multimin Vaccinations have been done on the 25.03.2021 and 24.06.2021. All sale bulls have received two shot this year and should receive a booster to fall into your own breeding program.

Benelkay stud is located in a Bovine Johne's disease protected clean area. There have never been any traces of this disease detected at our stud's properties. We have completed a Grazing Manual Biosecurity Template, version 1.1 before the 30/06/2017. There has been veterinary oversight into the development of our biosecurity plan, as we aim to remain a J-BAS 7 score.

## Treatments

All bulls have been treated on the 12.01.2021 with Ivomec pour and on 24.06.2021 with Ivomec pour on.

## Feeding

The Sale Bulls have been running together in a large mob of about 100 male cattle since weaning. From February 2021 they have been run in a sale mob of bulls in forage sorghum with access to self-feeders with a mixture of sorghum / wheat stubble hay, Palm Kernel and 20% cracked barley.

## Handling

All bulls are handled with four-wheel motorbikes and dogs. Our bulls have never been handled with horses. All bulls are quiet but as we all know they can react differently when put into pressure situations or different surroundings, particularly on sale day or being transported as they have never left the property.

## Semen / Morphology Tests

All bulls have been evaluated for breeding soundness and semen tested by Mark Baker, BVSc & Associates of Gunnedah Saleyards Veterinary Clinic. Testing was done over two days 23.06.2021 and 25.06.2021. Morphology testing has been carried out at the Goondiwindi Laboratories QLD. Individual morphology results will be available on sale day.

## Scanning

All bulls have been scanned for EMA, Fat (Rib, Rump, IMF%) and Scrotal Size Measurements, by Bovine Scanning Services (Lonnie Stone). This will be carried out in early-August 2021. The raw data will be available a few days before our sale day and on our web site as well as on sale day.

## Inspections

Inspections are welcomed anytime. Bulls will be yarded by 9.00am on Sale day. Pre-sale day inspections can be arranged by contacting Andrew Orman on 0427435201 or Elders Gunnedah. Supplementary sheets containing all relevant bull information will be available a few days prior to the sale and on sale day. If you would like a copy emailed to you please contact Andrew or visit our website or Facebook page to download a copy, a few days prior to sale day.

## Insurance

We have arranged for company insurance representatives (Elders and WFI) to attend the sale and we highly recommend that buyers insure their purchases from the fall of the hammer.

## Rebate

The vendors offer to pay a 2% rebate to outside agents who introduce their clients in writing to them 24 hours prior to the sale and settle in full on their behalf within 7 days of the sale.

## AuctionsPlus

The sale will be interfaced with auctions plus, for clients that cannot attend on sale day, please organize with your agent at least 24h hours prior to sale day. Phone bidding can be organised through Elders Gunnedah, contact Nick Hannaford 0417 201460 or Brian Kennedy Elders Stud Stock 0427 844 047, there is good mobile phone reception at the bull sale venue.

### Air Strip

An all-weather air strip is available 5km from the sale venue, to use this please contact Andrew Orman.

### Accommodation - We recommend

- Gunnedah:
- Maynstay Motel  
380 Conadilly St ..... (02) 6742 7150
- McKellar Motel:  
342 Conadilly St ..... (02) 6742 6838
- Boggabri
- Vault Accommodation  
135 Merton St ..... (02) 6743 4400
- Narrabri:
- Bellview Motel Narrabri:  
Cnr Newell Hwy & 132 Barwan St.... (02) 6792 3844
- Crossroads Hotel Narrabri:  
168-170 Maitland St..... (02) 679 25592
- Coonabarabran:
- Acacia Motor Lodge:  
10 John Street ..... (02) 6842 1922

### Delivery

Please fill out all details in the delivery slip at the back of this catalogue, and organise with Elders post sale before you leave, to aid in the delivery of your bulls. Delivery can be on sale day. If you wish to have another delivery date please contact Andrew Orman or Elders Gunnedah team. The vendors will provide all care with your purchases but will not be responsible after the fall of the hammer for any injury to bulls.

### Transport

Local carriers have been contacted and will be present on sale day. Please look for advertising within this catalogue.

### Breeding Guarantee

We have taken a lot of time and effort to ensure we are presenting fertile bulls for sale that are structurally sound to the best of our knowledge, we want good results from your investment, as do you. If you have any issues with your purchase please contact us, we are willing to work together for a resolution acceptable to both parties for any reasonable claim that is made in a reasonable time frame.

### Catering / Refreshments

The local Emerald Hill Progress Committee will be catering for the day.

### Risk & Responsibility

Any person attending the sale, do so at their own risk. The vendors assume no liability, legal or otherwise for any injury, accident, loss or damage to any person or property.

### Disclaimer

The vendors and agents have produced this catalogue with accurate information, however will not be responsible for any errors or omissions.

### GST

Prices for lots sold will be GST exclusive at the fall of the hammer and 10% will be added at time of invoicing.

**Freight Incentives  
available please enquire  
Andrew 0427 435 201**

### Directions to Benelkay Poll Bull Sale, at "Glenmore", Mullaley,

With navigators use Keechs Rd Goolhi as a reference point, with google use Benelkay Santa Gertrudis Stud.

#### From Gunnedah.

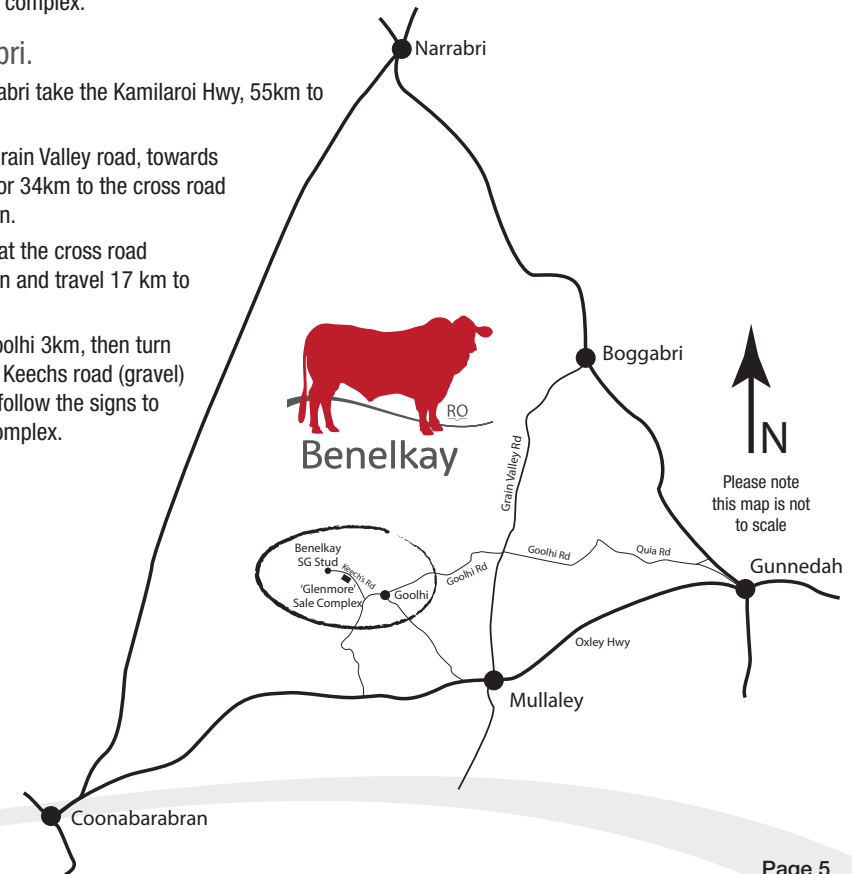

- From Gunnedah take the Oxley Hwy, 34 km's to Mullaley.
- Pass through Mullaley on the Oxley Hwy and travel 5km's towards Coonabarabran, then turn right onto the Booloola road, to Goolhi.
- 15km to Goolhi, turn Left and go 3 km, then turn Right onto Keechs road.
- 6.5km on Keechs road, (gravel) and follow signs to the sale complex.

#### From Coonabarabran.

- Take the Oxley Hwy 54km towards Mullaley; turn Left off the Hwy to Goolhi.
- 10km down the gravel road, turn Left, as you come onto the tar, onto Keechs road (gravel).
- Go 6.5km on Keechs road; follow the signs to the sale complex

#### From Narrabri.

- From Narrabri take the Kamilaroi Hwy, 55km to Boggabri.
- Take the Grain Valley road, towards Mullaley, for 34km to the cross road intersection.
- Turn right at the cross road intersection and travel 17 km to Goolhi.
- Go past Goolhi 3km, then turn Right onto Keechs road (gravel) go 6.5km follow the signs to the sale complex.

The Australian Poll Gene Marker test was initially developed by the Beef CRC and released to industry in 2010. The initial test was based on a single DNA marker and worked very well in some breeds, but not so well in others.

The test was further developed by the CSIRO, with funding assistance from Meat and Livestock Australia, and a greatly improved test was released in 2013. The improved Australian Poll Gene Marker test uses the same marker as the initial test but also incorporates information from nine other markers close by in the genome. The genotype information from all ten markers is combined to create a 'haplotype' to more accurately track the origin of alleles and associate them with being horned or polled. The additional marker information increases the proportion of animals for which the test returns an informative result, and also increases the accuracy of those results.

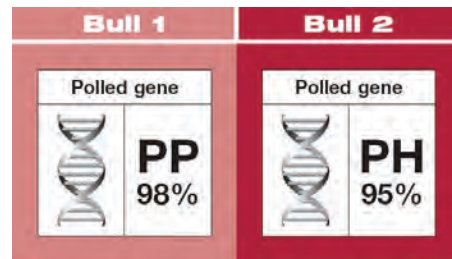

Breeders who are able to apply a level of selection pressure to their cow herd can also use the same philosophies that have been outlined for bulls. Retaining only polled or scurred females will increase the frequency of polled genes within the herd, while giving priority to polled females that have been identified by DNA test as being homozygous polled will maximise the rate of polled gene introgression into the herd.

Importantly, breeding for polledness should always be balanced with selection for other traits of economic and functional importance within the breeding objective. Simply selecting for polledness without any consideration of other important traits is not recommended as it may potentially compromise the genetics of animals for these other traits.

An example of the test result is displayed above right. The results will describe the percentage chance of the most likely genotype, with the possible genotypes being reported including homozygous polled (PP), heterozygous polled (Ph)

or homozygous horned (hh). The accuracy of the test result will be reported alongside the most likely genotype. This accuracy will range from 90% to 99%. For animals where the test cannot return an informative result (that is, the accuracy of the prediction is less than 90%) the result will be returned as ND (Not Determined).

For further assistance in understanding the genetics of polledness, or the use of the Australian Poll Gene Marker test, contact staff at Southern Beef Technology Services (SBTS) or Tropical Beef Technology Services (TBTS).

**Please note:** The results of these testings will be in our supplementary sheets a few days before the sale or contact Andrew 0427435201

## Looking after your new bull

We have put a lot into getting your purchase ready with breeding and management and now it is up to you to continue to prepare your considerable investment for the future.

### The following are a few tips:

- At auction sales, remember that possession is yours after the fall of the hammer.
- We recommend that you insure your bull - it is a new asset to your property.
- Pen bulls on the truck from different vendors / properties separately.
- Handle him quietly at all times, no buzzers have been used on these bulls.
- Have some cattle in the yard for company to run him with for a week or so to get acquainted to your property. All will be strange to him as he has been taken from his mates and even the water and feed will be different as well as your environment.
- Check the health treatments he has had and that they are appropriate to your area and treat with anything additional you think he might need after he has settled in.
- At joining it is preferable not to mate young bulls multiply with older sires, as they will not allow the young bulls near the cows and they could get injured.
- Try and get him to his selected group of cows preferably in a group with other cattle or bring the group to him.
- Check him regularly, seeing he is walking well, no swelling of joints or in his sheath, if possible that he is serving and that not too many cows are returning to heat.
- If you suspect any problems occurring quick action may cure a problem before it escalates.
- Have a spare bull or bulls available to cover

any break downs, do not give the young bull increased numbers of females to cover other breakdowns within the herd. Also young heifers may be in heat for less time than cows and you will need more bulls to cover them.

- After the joining remove him and give him any health treatments such as for internal and external parasites and any vaccinations appropriate to your conditions.
- Give him every chance to grow out and develop after his first joining as your Santa bull will continue to grow and be cutting teeth, for at least a further twelve months.
- Annual pre joining vet examination will help with your next joining results.
- Bulls are a large investment for any breeding herd and they have a major effect on herd fertility. A little time and attention to detail to make sure they are fit, free from disease and actively working is well worthwhile and can deliver huge results to our agricultural businesses.

If you have any queries or problems please contact us as soon as you can so that we can assist you.

## How to Register and Bid on AuctionsPlus

- 1 Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.
- 2 Select “**Sign Up**” in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select “**Dashboard**” and then select “**Request Approval to Buy**”.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

## BENELKAY STUD

### History:

In 1963 the Benelkay herd had its beginnings situated west of Walgett as a cross breeding operation, started by Andrew’s parents Dick and Dianne Orman. The cow herd was based on Weebollabolla Shorthorn cows and Santa Gertrudis Bulls, mostly of Wave Hill, Gylanda, Ameroo, Kalinga, Pampoola, Marengo, Murrumbo and Yarrowonga bloodlines. In 1970 the Benelkay stud was registered with the SGB(A)A and became Stud number 810 . With the select purchases of stud cows and the existing commercial line of straight Santa Gertrudis cows, the stud had a good genetic base to form the early stud and grow it into what it is today.

Today the Benelkay Santa Gertrudis Stud is run on “Glenmore” and Tuppence”, located 34km North West of Mullaley, in the Goolhi district, or 68km West of Gunnedah. “Glenmore” is a 1650 Ha property comprising of gently undulating to hilly country with a mixture of heavy black basalt, red clay loams and sandy soil types.” Tuppence” is a 730 Ha property situated next to Glenmore, and was originally part of the historic Goolhi Station, that once covered most of the North Western side of Mullaley. Tuppence is the location of the new Benelkay Sale Complex that was built for our second annual sale. The stud has become our passion some say obsession, and something that we enjoy as a family with our two children Sam and Georgie helping and being involved when they can.

### Stud Focus:

With a strong genetic base of 400 classified stud cows. Benelkay is well placed to breed cattle to suit the modern-day commercial cattleman. With a strong emphasis on poll cattle that can have the ability to enhance the carcass traits in the stud and commercial cattle industry. We have selected and used only poll sires for over thirty years giving us a large genetic poll base to draw from. This year’s sale team will have twenty Homozygous (PP) bulls represented which gives the industry an opportunity to be able to purchase sires

to fast track their own herds towards poll genetics. These results will be on the supplementary sheet as well as in the catalogue. The Benelkay stud is run on a commercial basis with no favouritism. With years of work going into the fertility, temperament and the need to breed cattle that are soft, easy doing and are saleable all year round we have found this style of cattle can compete with and better other breeds, but still retain the excellent attributes of the Santa Gertrudis Breed. We have found over time that moderate cows have the best fertility and we can move a little each way with size to suit the needs of most beef markets. Our entire herd is performance recorded, all stud and commercial cows with Santa Gertrudis Group Breedplan. We find Breedplan, a useful tool in our herd selection, as well as using visual assessment. Both tools enable us to make fast gains in the desired traits we believe our herd needs to be achieving.

Sires in the past years making an impact on our stud’s direction, have been, Sanford Vale Juggler (P). Wave Hill F73 (P), Wave Hill Napperby (P), Bullaminkinka H82 (PS) and Bullamakinka Dreamtime (P). Also, SuJo First Class (P) who has proven to be a wonderful sire, taking the stud forward in the direction, we believe the industry needed to be heading. His progeny has had a huge impact within the stud, and we are still benefiting from his strong bloodlines.

Every year we try to bring new genetics into the sale for our clients. This year we are proud to introduce two new Sires Benelkay Mohican (PP), and for the second year Yarrowonga M134(PS). They have introduced fresh genetics within our herd and have contributed to the sale team very positively. We feel M134(PS) will continue to contribute to the genetic growth of our herd, as he has some of the leading bulls in the 2021 Sale Team. Mohican (PP) is breeding progeny with strong phenotype and scale. His females will be a feature of his legacy as they are standouts in the heifer mob.

## BURRAMURRA BOSS 152 (PP)

Boss Homozygous poll was purchased as a led bull at the 2016 Santa Central Sale for \$17,000. Weighing 891kgs at 22months with a DWG of 1.30kg, Scrotal of 40cm

200D	400D	600D	Mat. Cow	Milk	SS	Carcass Wt	EMA	Rib	Rump	RBY	IMF (%)	Drm Index (\$)	Exp Index (\$)

Sire of lots 3,5,9,17,18,20,28,32,37,38,& 41

## DANGARFIELD YOUNG GUN Y264 ET AI (PS)

Young Gun was purchased at the 2016 Dangarfield on property bull sale as a 21month old bull, weighing 800kg's with a DWG of 1.20kgs, 41cm Scrotal and an EMA of 121. Young Gun is a very thick set bull carrying good length and width throughout his carcass, a fantastically naturally quiet temperament that he has passed on to his progeny has been a pleasing aspect. His sire Valliant (P) was purchased by Yugalbar for \$26,000, his grand sire is Dangarfield Quarterback (P) one of the most influential sires in the Dangarfield herd and his dam has been used as an ET cow producing eleven calves. Young Gun is producing progeny with that extra bit of doing ability which we would expect by his pedigree. His sons make ideal heifer bulls, producing small calves, that have finishing ability.

200D	400D	600D	Mat. Cow	Milk	SS	Carcass Wt	EMA	Rib	Rump	RBY	IMF (%)	Drm Index (\$)	Exp Index (\$)

Sire of lots 1,2,21,26 & 27

## YARROWONGA M134 (PS)

Purchased at lot 4 for \$38,000 in the 2017 Yarrowonga Waco Annual Bull Sale. M134 (PS) a son of Waco Zeus, at 25 months had a 93% morphology, 40cm Scrotal, 1.20

200D	400D	600D	Mat. Cow	Milk	SS	Carcass Wt	EMA	Rib	Rump	RBY	IMF (%)	Drm Index (\$)	Exp Index (\$)

Sire of lots 6,8,10,11,16,23,25,29,30 & 36

## BENELKAY MOHICAN M034 (PP)

Homozygous poll Mohican was what we considered one of the best bulls we had produced to date and so the decision was to keep him. A son of Benelkay Gyril (P) and out of a Warenda Furlong (P) cow Benelkay J123 (PP). As bad luck has it, we lost him in the drought and sold most of the cows he was joined to. But he has sired two outstanding sons in the sale team and produced eight outstanding females. Top 5% for all Growth EBV figures. We think a lot his bloodline.

200D	400D	600D	Mat. Cow	Milk	SS	Carcass Wt	EMA	Rib	Rump	RBY	IMF (%)	Drm Index (\$)	Exp Index (\$)
+19	+31	+46	+56	+1	-0.1	+18	+2.1	-0.1	-0.3	+0.6	-0.3	+\$19	+\$23
73%	71%	74%	67%	40%	71%	60%	51%	57%	57%	45%	58%		

Sire of lots 7 & 19

### BENELKAY LUCKY L114 (PS).

Lucky carries strong Santa Gertrudis phenotype, naturally placid temperament, exceptional length, volume of carcass with strong width over his topline and good neck extension. At 25 months he weighed 946kg's, 1.26 DWG, Morphology of 83%, Scrotal 39cms, 127 EMA and 5.5 IMF. We kept this bull as we felt he was the best bull in the 2015 drop and had explosive weight gain and growth for age. His dam 1861 (P), a cow that goes back to Benelkay Hardi (P) (selling for \$30,000 in 2006 to Dangarfield Stud). He has not let us down breeding consistently well, producing dark red quiet progeny with length. His top priced son in 2020 was Benelkay Pearl (PP) selling for \$11,000 to Grassbrook Pastoral.

200D	400D	600D	Mat. Cow	Milk	SS	Carcass Wt	EMA	Rib	Rump	RBV	IMF (%)	Dam Index (\$)	Exp Index (\$)
+15	+30	+45	+44	+3	+0.2	+17	+2.2	-0.9	-1.0	+0.4	-0.5	+\$15	+\$16
84%	81%	84%	75%	46%	81%	68%	60%	68%	67%	54%	68%		

Sire of lots 31,33,34,35,39,40,42,& 43

### BENELKAY HOT SHOT H074 (PP)

We retained this Sire from our 2012 H drop bulls. Backed up by his EBVs trait leader for 400,600 Day Growth, Carcass Weight and EMA. Being Homozygous poll with a morphology of 96% as a two-year-old, we felt we could not sell a bull of his calibre. He carries strong Sire appeal and breed phenotype, a soft dark tropical skin / hair type, with length, depth and strong bone. Hot Shot comes from a strong female line within our cow herd that have bred consistently above average cattle going back at least six generations. Benelkay Lucky (PS) has been kept as a sire and his son Benelkay Noteworthy (P) sold for \$16,000 in 2019 to David and Annie Beare, Rangelands SGS.

200D	400D	600D	Mat. Cow	Milk	SS	Carcass Wt	EMA	Rib	Rump	RBV	IMF (%)	Dam Index (\$)	Exp Index (\$)
+19	+32	+42	+48	+4	0.0	+20	+3.9	-0.3	-0.4	+0.6	-0.4	+\$15	+\$9
90%	86%	88%	83%	60%	85%	73%	65%	72%	72%	59%	72%		

Sire of lots 12,22 & 24

### BENELKAY GYRAL G152 (P)

Gyral (P) was retained for use in the stud to keep the Bullamakinka Dreamtime (P) bloodline developing throughout the cow herd. He is a later maturing style of bull and has developed into a massive mature bull, being a similar style of bull to Dreamtime only bigger. From a strong female line, with his grand dam breeding eleven calves and one other sire we used successfully in the stud, Benelkay Lynx (P). We kept two sons as sires in 2018, Benelkay Mohican (P) and Benelkay Missouri (PS). Gyral (P) throws consistent cattle with scale, breed type and style.

200D	400D	600D	Mat. Cow	Milk	SS	Carcass Wt	EMA	Rib	Rump	RBV	IMF (%)	Dam Index (\$)	Exp Index (\$)
+5	+12	+16	+13	+3	-0.3	+3	-1.5	+0.2	-0.1	-0.5	0.0	+\$3	+\$5
85%	84%	84%	79%	61%	81%	71%	63%	69%	68%	56%	69%

- Earthmoving
- Road Transport
- Automotive
- Marine

*Benelhay Santa Gertrudis has been using the full BG fuel product range on our diesel farming plant with very pleasing results. A proven product for our business and extending our machinery's productivity. Smoother running engines, better fuel efficiency and eliminating condensation in on farm storages are just some of the benefits we are getting with BG.

**COMMENTS:**

Benelkay Quintus (P). A very young bull in the sale, but holds his own against the older bulls. Strong muscle pattern, sires head, clean sheathed, a real carcass bull that I feel would benefit both stud and commercial herds. Well balanced EBVs Top 10% EMA and 200 Day Growth. Top 15% 600 Day. Top 20% Mature Cow Weight. Dam L205 (P) good young cow three calves one other sale bull.

Purchaser: .....\$.....

Introducing...

## Stud Ultra Finish

Premium Finisher Pellet for Stud Cattle

High energy, high protein (16%) - high quality pellet designed specifically for Stud Cattle.

Formulated for optimal growth rates, muscle definition and shiny coat.

Very safe to feed – reduces issues with acidosis, laminitis and bloat.

Very high, balanced vitamin and mineral profile – designed with fertility in mind.

An ideal product to be fed in with green pasture such as oats to minimise scouring, while providing the finish and glossy coat on stock.

**Also available:**

- Stockfeed
- Dry Lick Supplements
- Protein Meals and Concentrates
- Bulk, bulk bag or bagged

Nutramix is a proud supporter of

**MULTIMIN<sup>®</sup>**  
Injection for Cattle

**OPEN THE WINDOW OF PRODUCTIVITY  
AT DRY OFF AND BEFORE CALVING.**

Deliver essential trace minerals quickly when they have the most impact.

MULTIMIN<sup>®</sup> is a multi-mineral injection designed to be used at critical times in the production cycle, including at dry off and before calving. The 60 days before calving is an important window of productivity because during this time, the trace minerals in Multimin can assist in the development and health of the calf and help cow health after calving.

- Contains selenium, copper, zinc and manganese, trace minerals that are essential for normal immune function and improving disease resistance.
- A healthier herd means a healthier bottom line.

**Contact your local area sales manager today.**

MULTIMIN is a registered trademark of Virbac (Australia) Pty Ltd.

Passionate about animal health

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

2

Select "Sign Up" in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select "Dashboard" and then select "Request Approval to Buy".

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.
