GLENLEA DOMINATES JUNIOR FEMALE CHAMPIONSHIPS AT BEEF AUSTRALIA 2021

TOP:

Glenlea Mandy Q335 (P) Our Junior Champion Female at BEEF Australia in May at Rockhampton QLD, sired by Leading sire Glenlea Honorable (P) R/F. Glenlea had an outstanding show with our females, taken out 3 out of 4 of the Junior female Championships, All sired by Glenlea Bred Sires. Mandy was purchased privately by Luke and Leigha Gardner, Tallimba Charolais Hunter Valley as a foundation female for their Stud. Photo at 18 months.

MIDDLE:

Glenlea Confidence 32nd (P) R/F Our Reserve Junior Champion female at BEEF Australia. PP Polled and by Glenlea Kenworth (PP) a sire breeding outstanding progeny. Confidence was also Grand Champion female at the Charnelle invitational sale in March. Purchased by CCJ Charolais, the Cooper Family, Willowbank, QLD to add to their elite females. Photo at 18 months.

BOTTOM:

Glenlea Isabella R24 (P) R/F Reserve Heifer Calf Champion. She was our high seller at our "Dawn of the Decade". Selling for \$26,500 to Daniel and Ashley Humphrey, Ashdan Charolais, Johns River, NSW. Sired By our leading Red Charolais sire, Glenlea Just Red (PP) R/F. Izzie will become a cornerstone donor in their elite program. Embryos will be available in 2022. Photo at 14 months.

Glenlea Beef Annual Female Sale
1pm Friday the 29th October 2021
Scone Saleyards & via AuctionsPlus

Welcome to GLENLEA BEEF'S 2021 Scone Female Sale

**Incorporating the Upper Hunter Multi Breed Restocker Female Sale
from some of the Upper Hunters Leading cattle producers.**

This is our 2nd major female sale this year. This sale has a commercial focus. We have catalogued 40 PTIC 2 year old commercial heifers in calf to a proven calving ease sire who has been used in our herd for 4 years now and is leaving great progeny, Challambi Muscles (PP). Four of the Six bulls being offered are by him as well so you can see what his progeny grow into.

BREEDPLAN performance recording is one of the cornerstones of our breeding program. All the registered females have growth and carcass data submitted to BREEDPLAN for analysis, this give our EBVs real meaning and higher accuracies. EBVs of course are only one tool in the process of producing more profitable genetics to increase value throughout the supply chain for our clients. The physical traits that are not measured by BREEDPLAN but are so important to all producers to keep making productivity gains are constantly being assessed and as the average increases the non-performers are eliminated.

GLENLEA is celebrating 49 years of continuous Seedstock Production in the Charolais Breed in 2021, and 48 years as a member of the Charolais Breed Society. From Tasmania our origin, to NSW Northern Tablelands and now based on the Sub Tropical North Coast of NSW. Our experience and depth of knowledge in the breed and our expansive marketing network position us in unique position to take all our partners and stakeholders forward in an inclusive and prosperous future.

What an exciting time in the cattle industry and especially the seedstock business, with producers everywhere down on stock numbers. Now more than ever all producers are seeking extra genetic value in all their cattle, with higher performance Charolais cattle and Charolais X cattle attracting record pricing in all sales, both at Auction and in the paddock.

This sale has something for everyone. A complete joining group of young registered cows, all with calves at foot planned mated with one sire, Glenlea Honorable P80 (P) R/F. Another complete draft of 2020 Winter born heifers from one management group, multiple sires, all joined to one sire Glenlea Quarterback (P) R/F that is an ideal type mating with this outstanding draft of herd building heifers. Additionally, 40 PTIC commercial heifers and 6 specially selected bulls, and closing out the sale a group of unjoined heifers from our good friends and guest vendor Calmview Charolais.

Every single female in this sale we would be happy to stay in the herd and continue to breed from! **GLENLEA BEEF BACKS THIS UP LIKE NO OTHER CHAROLAIS STUD BUSINESS IN THE COUNTRY! WE WANT FIRST OPTION TO BUY BACK ALL BULL CALVES BORN OUT OF THESE FEMALES BOTH STUD AND COMMERCIAL, AT PREMIUM RATES AND FURTHER INVITE SUCCESSFUL PURCHASERS TO REJOIN THESE FEMALES TO AN ELITE GLENLEA SIRE TO PRODUCE MORE INTO THE FUTURE AND BECOME PART OF OUR EXPANDING BULL BREEDING SUPPLY CHAIN.**

The cows and calves have had no special preparation, they have been running at Guyra through the Winter with lick block as the only supplement. The stud heifers have been prepared on a special cooler feed ration at Casino under the expert management of Pinedock Fitting, James and Jane Dockrill. The commercial heifers were raised near Crows Nest north of Toowoomba in Tick country, they were run at Guyra from November 2020 till winter when they were moved, joined with the bull, east of Scone at Belltrees. These females were drought calves and weaners and so had major checks in their growth, so will continue to grow out on quality country. They present in store to forward store condition and will do extremely well where ever they go. Many stud Charolais breeders will tell you that drought born females go on to produce longer and often well above themselves in type.

On behalf on the whole team of people that contribute to making Glenlea Beef work as the diversified seedstock business it is, we welcome you to join our growing team and look forward to assisting you with your purchases, which is the start of our relationship, and helping you develop your program. From assistance with marketing your cattle in conjunction with your agent, advising on sire selection and mating choices or in any other way we can.

Regards, Roderick Binny

~ Glenlea Beef ~

Background, Bloodlines, Breeding Strategy & Customer Service

Australian Charolais breeders have embraced performance recording as other countries have reduced their efforts, I have seen this first hand in north America. Our data now is more accurate and detailed, making looking overseas less likely to add genetics that take your herd forward in genetic development than using **Australian evolved genetics that are the best in the world for our environments and markets** with large amounts of individual data to help us as seedstock producers, identify positive influences.

Glenlea beef is now a large seedstock enterprise, including JV herds total over 500 Charolais females. We have been using **Australian bred sires** to continue the evolution of the herd over the last 10 to 15 years with limited use of overseas sires. Where you will see overseas as well Australian sires in the Glenlea herd is in our E.T. program using **exclusive proven sires** in very specific planned matings to produce elite progeny from our highest genetic merit females, our donors!

Our genetic base of the Glenlea herd is now as diverse as the breed in Australia, with a blend of many bloodlines and different phenotypes to produce an Australian type Charolais. We have a degree of type variation, which is necessary with our range of markets and geographic footprint, from higher growth and yield types for northern markets over bos indicus cows to more moderate, early maturing types that suit more southern markets, but all assessed through the same process for all economic traits. This will be evident through the catalogue and comments, and EBV's on individual lots will highlight this.

Our breeding strategy is to produce powerful performance cattle in a medium to moderate frame score with a complete carcass. By that we mean above average yield, EMA, fat cover and IMF%. Measuring birthweights to be able to assist our bull clients to make the best selections for their operation and maintaining calving ease through BW and early gestation length.

Maternal strength focus on fertility, milking ability with great udders and moderate sized teats for longevity. While we are primary a terminal breed, in northern markets especially, Charolais x heifers are retained in there 1000's, so as seedstock producers we must always have our customers and in turn their customers in the front of mind in our breeding decisions, as those decisions ripple down the supply chain and leave big impacts, both positive and negative.

Polled genetics have progress in our breed to match horned bloodlines for every economic trait. Our herd still has a number of horned females and these are joined to homozygous polled sires. 98% of our calves born in the last 5 years are polled, many homozygous, and all testing will be available in catalogue or supplementary sheet.

BREEDPLAN is a genetic evaluation tool now over 30 years old and proven across many breeds and countries. We no longer print a detailed general explanation in our catalogues for bull sales or female sales as that information is available at the touch of your phone screen or click of your mouse! We are happy to explain any of the finer points of EBV's as they relate to the Charolais breed and specifically to our cattle, just call and ask! In the comments of each lot, you will see our summary of the EBV's printed for that lot.

Customer Service is at the heart of what we do, we spend much of our time travelling to clients both commercial and stud to help with a full range of services. We provide many services to all our clients from the most basic to full stud breeding and marketing support. Your success is our success. We are here to assist and work with you and your agents to help you achieve the highest possible price for your Glenlea sired stock.

Glenlea Beef would like first option to purchase back bull calves from ALL of these females we are offering in this sale.

We would attend your property pre marking and determine which bull calves are to be left entire and a complete a forward contract and price at that time.

Bull calves would be yard weaned at your property and we would collect them at 8 days post weaning.

We would invite any purchasers of our females to join their females back to a sire that we would discuss, which may be a leased Glenlea stud sire, a purchased young sire from us or A.I.

This program will continue indefinitely into the future working with you and your preferred agent to have a premium guaranteed market for your Charolais male progeny. We work with our purebred breeding clients closely with breeding decisions, marketing surplus heifers and steers to premium markets and in numerous other ways.

Our commitment is to work closely with you to maximum returns and personal enjoyment from your investment.

This program is an integral part of our business as we seek to grow our bull breeding business to larger numbers. The program is well established and we currently several hundred females in this program.

Our first Scone sale is a new way to do this and we hope as many successful purchasers as possible work with us to produce superior genetics that add value to the whole supply chain.

To discuss any aspect and more details of this program, just call Roderick on 0409 911 791.

SCONE FEMALE SALE

Incorporating Upper Hunter Multi Breed Restocker Sale with 700 Females.

1pm Friday 29th October 2021 at Scone Saleyards and via AuctionsPlus

Conditions of Sale

INSPECTIONS

Stock will be available for inspection from 9am on the 29th of October or by prior arrangement. They will be onsite at Scone from Wednesday 27th of October.

HEALTH

All females have been vaccinated for 3 germ blood or raised in Qld coastal ticky country and have 7 in 1 booster in two months prior to sale. Glenlea Beef is a JBAS 7 herd.

GUARANTEE

All joining age females are sold as fertile breeders, calves at foot are excluded both heifers and bulls from any guarantee. If there is an issue with a breeding age female we will simply work out a solution with the purchaser that is satisfactory to all parties, we stand behind our cattle and just fix a problem if and when it occurs simply and easily.

INSURANCE

We recommend you insure your purchases. Agents can arrange this at fall of hammer sale day.

AGENT REBATE

A rebate of 1% to all licensed agents is available, introducing buyers 24 hours prior to sale and settling accounts within 7 days. This is not in addition to any agent to agent reciprocal arrangements with agents. Only one agent rebate is available per lot.

REFRESHMENTS

Kiosk will be operating

TRANSPORT

Delivery will be coordinated by Selling agents. Stock can be fed while awaiting transport. Scone is a major hub and economical transport can be arranged easily.

PHONE BIDDING

Phone bidding is available by contacting the agents or vendor prior to sale to arrange for a dedicated agent to call you and assist you with your bidding.

AUCTIONS PLUS

Sale will be a live auction with all lots coming through the ring, live broadcast of lots in ring will occur as well as pre recorded video of individual lots, bidding through the Auctions Plus platform will be by normal method online.

ACCURACY OF CATALOGUE

Every effort is made to be as accurate as possible. However mistakes can happen in the construction of catalogue and printing, we will resolve any issues by discussion with purchaser but make no warranty.

August 2021 Australasian Charolais BREEDPLAN Analysis										
Charolais GROUP BREEDPLAN	BW	200	400	600	MCW	Milk	SS	EMA	Rump	IMF
EBV	+2.7	+15	+27	+45	+51	+4	+0.6	+1.9	+0.4	+0.2
Acc	53%	51%	50%	51%	46%	41%	49%	37%	40%	36%

To lead off this sale we had to come up with something special. And what a group of **lovely young polled stud cows** we selected. Great types bred in multiple herds and all with calves at foot by P80.

This is a **Complete Joining Group**, they have been together since they were heifers, all are being offered. Lovely udders, good temperaments. The females are bred from leading bloodlines, their body type and EBVs were matched with P80 in very deliberate planned matings, to produce high performance progeny with growth, bone and carcass and that were **Red Factor and Polled**. You be the judge of the resulting progeny!

The calves are so consistent with some outstanding sire prospect bulls and elite heifers. This is an opportunity that rarely comes along to access quality young stud cows with elite progeny at foot as a line, to expand a stud herd or start one and to select individuals to enhance a quality commercial herd.

COW COMMENTS:

Long bodied, feminine, lovely udder, fine coated.

Sired by performance leading bull Lannister out of a leading cow family at Charnelle.

EBVs Low BW, excellent growth well above average and top 15% EMA and top 10% Fat Cover.

CALF COMMENTS:

Strong Polled, red bull calf at foot. GLE S109E.

COMMENTS:

Deep bodied, very well-made young cow, fine hair type, will calve before sale.

Many of the heifers later in the catalogue are sired by the same bull so N44 is a window into the future of what those outstanding joined heifers will grow into.

EBVs moderate BW, above average growth and EMA, with extra overall yield.

GOBONGO ISABELLA (GO T48E)

COW COMMENTS: We have picked out a special cow and calf. This cow is a full sister to GLE L22E sold to Wilde's Pastoral at our Dawn of the Decade Female Sale in March this year for \$12,000 as a joined cow with her weaned 10-month-old heifer GLE R24E topping that sale at \$26,500 selling to Daniel and Ashley Humphries, ASHDAN Charolais. K60's dam has been in our donor herd, her sister L22 was in our donor herd and will be the lead donor in the Wilde's herd. Her Grand dam was also a donor.

K60 has produced some outstanding progeny including her first bull calf being a stud sire for Taylor Charolais, a daughter topping our 2019 Female Sale in the joined heifer section, and two outstanding sons PP POLLED that have been high sellers. We retained semen and an interest in her 2020 bull to use in the herd.

Her heifer calf is sired by the powerful breeding bull Glenlea North, co-owned with Shandon Charolais, who is producing progeny with extra carcass and growth in an early maturing body type. We have a number of outstanding progeny by "North" coming through and they will feature in our Bull and Female Sales in 2022 and beyond.

K60 was to join the donor herd and was to be flushed this spring, we did not do this, and we selected her to feature in this sale, so is open ready to flush or join immediately.

CALF COMMENTS: GLE S17E born 11/04/21 is a beautifully balance heifer that I am sure will out breed her mother. She is a prospect show heifer that could be shown at Sydney Royal in 2022. She could go back to Pinedock Fitting in familiar environment to be prepared for the show.

This complete draft of **winter drop 2020 joined heifers**, lots 25 to 59 are from one management group. None have been excluded. All are registered, Sire Verified and Poll tested, fully performance recorded with growth and carcass data submitted to Breedplan to produce higher accuracy EBV's. Lots 45, 46 and 47 are not included in this group.

All have been Tick Fever vaccinated to enter Ticky areas of Qld.

All but 4 have been A.I.ed to GLENLEA QUARTERBACK (PP) R/F, A Homozygous Polled Red factor son of Silverstream Holster (P) and out of our Oldest Donor Glenlea Janet Z8 (P) R/F, still active in the herd at 17 years. Quarterback is a Low BW, high yielding carcass sire that will combine ideally type wise with these highly maternal charolais heifers. His first calves are moderate at birth, many are Red and all Polled, and display lots of carcass. Semen is available through United Cattle Breeders Allora Qld or direct from GLENLEA BEEF.

TATTOO: DG1 R27E

DOB: 13/07/2020

COLOUR: White

COMMENTS: This heifer stood out to all of us on cataloging day. Bomb proof temperament, deep, thick and soft, a donor in the making. We didn't realize until later that she was also out of a Glenlea bred dam, this is the type we aim to breed as she will produce sale topping bulls and herd building daughters.

Breed leading EBVs with outstanding carcass data.

A.I. 9/9/21 to Glenlea Quarterback (P) R/F

The Dockrill family are an integral part of Glenlea Beef and provide a range of services, from feeding and showing our cattle, preparing bulls for our range of bull sales, marketing photos, clipping and video taking, production and editing. Additionally an increasing amount of private bulls directly from their Casino, NSW property.

All the rest of the Glenlea Beef team thank them for all their support, input and hard work without which Glenlea Beef could not operate in the way it does currently.

Sire of 4 of the Registered Charolais Bulls

August 2021 Australasian Charolais BREEDPLAN Analysis										
	BW	200	400	600	MCW	Milk	SS	EMA	Rump	IMF
EBV	-2.3	+15	+36	+45	+33	+13	+2.7	+1.3	+1.8	-0.3
Acc	69%	65%	66%	66%	60%	55%	66%	51%	58%	51%

These six young sires were specifically selected for this sale. Early maturing, Low BW all below breed average, extra fat cover, above breed average growth and all polled, so progeny are finished as vealers or yearlings of grass. Fully performance recorded and a summary of each bull's EBVs are in his lot comments. These bulls are at the leading edge of the breed and are our last bulls to be offered at Auction for 2021, which has seen over 150 bulls sold throughout NSW and QLD. We are planning to sell over 200 in 2022. Breeding bulls to improve profitability across the supply chain is our core enterprise not a sideline and is what work at everyday in our business!

Four of these bulls are sired by "Muscles". His background is detailed in the next section as joining sire to the commercial heifers. These are typical of his sons and we are sure they will impress upon inspection.

The last bull on offer is a composite Charolais sire X Angus Dam, Homozygous Polled, Red Factor, fully performance recorded and his EBVs indicate very Low BW suitable for heifers with early maturity and extra fat cover. We breed a select number of these bulls each year and R98 is a very good example of this type of bull where he can be used over Charolais infused females to keep progeny at 50% Charolais.

All of the Commercial Females have been PTIC to calve from March 2022 to “Muscles”, our go to heifer bull in last couple of years. This sire purchased from Nigel Spink, Challambi Charolais, as 12 month old sire prospect in 2017 as the top priced bull in his and Huon Charolais combined Spring bull sale in southern NSW. Early maturing, Low BW and easy calving, he has produced top shelf progeny from many heifers and selected cows. Many of his sons have sold privately as yearlings, showing early maturity, finish and carcass shape and attracting the interest of buyers.

These commercial Charolais females were drought born, in coastal ticky country in QLD, once weaned they had to fend for themselves. In November 2020 they were brought to Guyra and had the summer and autumn there before moving to the Hunter Valley east of Scone to “Belltrees” where they wintered and joined on native country. They will continue to grow out as they mature into good framed highly productive females.

Their progeny by Muscles will be desirable as herd bulls and as we have stated previously in this catalogue, Glenlea Beef would like first option of purchasing back male progeny as bull calves at a premium rate to the market at that time.

We have been doing business with Calmview Charolais for many years and was natural when planning this sale to invite Tony and Suzie Farrell to sell a selection of females.

The line they have put together are well bred, with solid data and young females that will grow out and produce quality progeny throughout the 2020's.

These cattle have been raised on the Far north coast and will perform anywhere they go, including back to the north coast so regardless of your location you can buy with confidence.

They feature two current sire bloodlines in their stud Palgrove Monarch (P) and ANC Nasdaq (P) the older heifers are ready to join with the younger ones suitable to join in the Autumn 2022.

LOT 106 CALMVIEW PONAOVA Q88E (P) (R/F) (TW)
